Strategic Priorities

1 - Financial Sustainability

We will move towards financial independence and sustainability, by promoting stewardship (including tithing) among our people, by careful financial management, and by promoting enterprise skills at the community level for reducing reliance on external sources of finance.

2 - Discipleship

We will engage in theological education development at all levels for equipping of soldiers (members) and officers (ministers).

3 - Growth

We will open new plants (e.g. societies) and re-open some former mission-units (e.g. corps, social centers) based on assessment of mission potential.

4 - Relationships

We will develop new and existing relationships with government officials, and with other churches, at both divisional and territorial levels.

5 - Leader-development

We will develop officers through effective succession-planning, leader-development, and 'refresher' courses.
